DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 is inconsistent with the claim from which it depends. Claim 7 recites, "said first through fourth panels are substantially from lines of weakness." However, claim requires the first through fourth panels being defined by first, second and third fold lines. A fold line is considered to be a line of weakness to facilitate creasing.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5, 8 and 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hutchinson.

The adjective "postcard" in front of the term "plies" imparts no structure to the permanently adhered mutually facing portions of the first and fourth panels and the permanently adhered mutually facing portions of the second and third panels that is not disclosed in Hutchinson.

Regarding claim 5, adhesive areas 29 are considered to be adjacent the top edges of the first panel 24 and fourth panel 26 in Hutchinson to the same degree as claimed.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hutchinson.

Hutchinson discloses the claimed invention except for the outgoing address area being 47 defined on the first face of the third panel 27. It would have been obvious to one having ordinary skill in the art at the time the invention was made to locate the outgoing address area of Hutchinson on the first face of the third panel 27, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

Allowable Subject Matter

7. Claims 10-15 are allowed.

8. Claim 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
